

Specifications

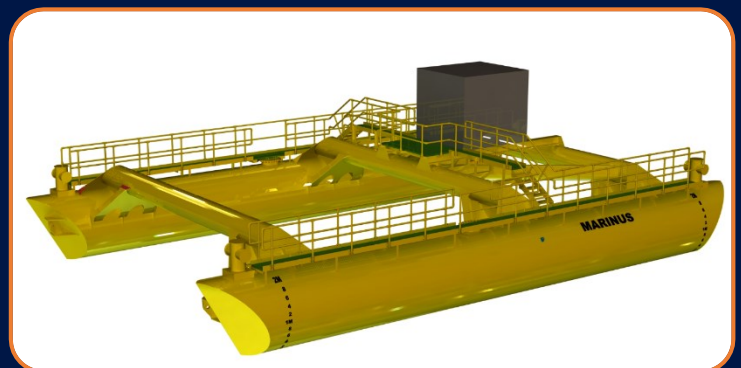

“MARINUS” Mobile Marine Platform

Leask Marine has developed their “MARINUS” Mobile Marine Floating Platform (MMFP) for charter. The Marinus MMFP is a stable catamaran platform designed for aggressive marine sites which has been built, tested and its performance verified which adds significant value to any industry project.

The MMFP can be fitted-out and deployed at short notice to test a range of new marine technologies by Leask Marine’s design & civil engineering team, using our in-house fabrication capabilities. The MFP allows any technology developers to demonstrate their equipment from an established and ready-made platform for any period of time in real life scenarios.

General Dimensions

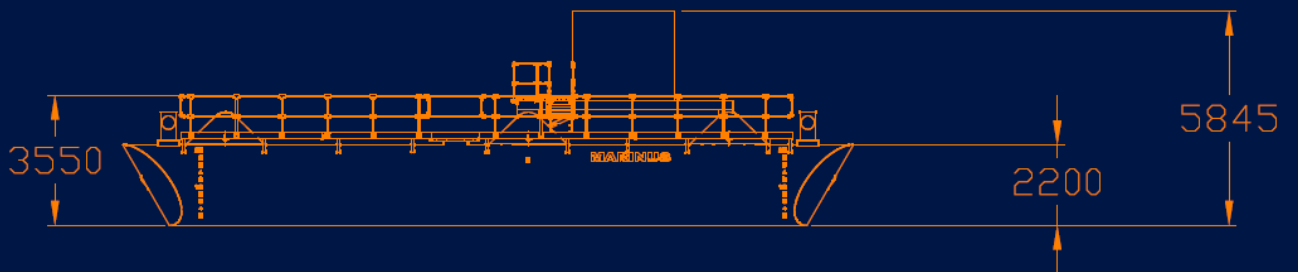

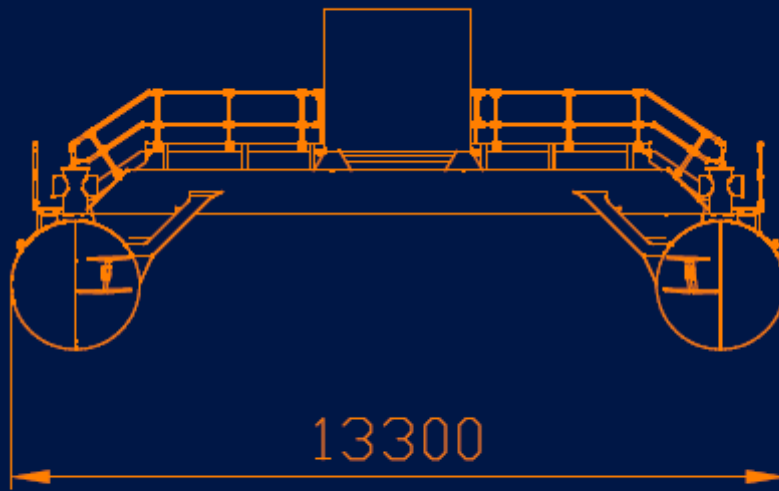

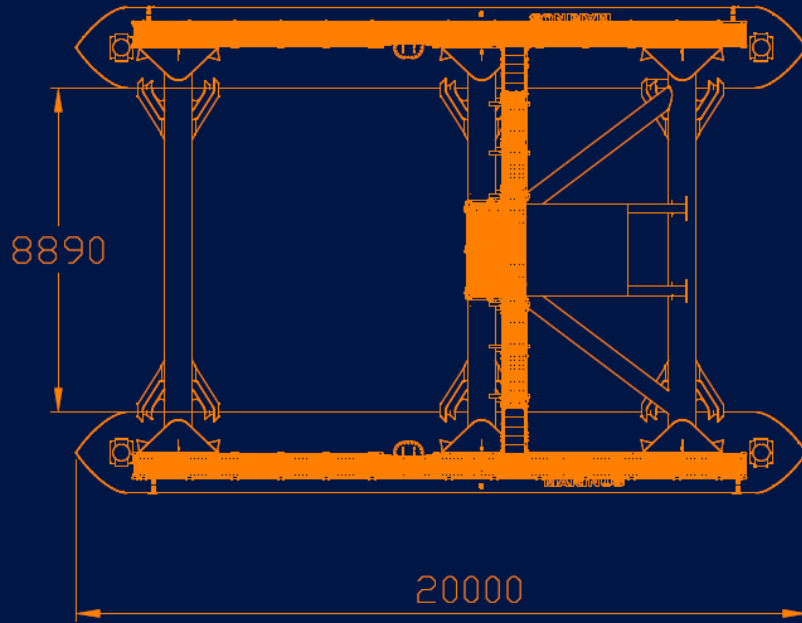

Length.....	20000mm
Pontoon Diameter.....	2200mm
Beam.....	13300mm
Draft	1100mm
Weight	45te
Load Capacity	25t
