SUSTAINABLE PROCUREMENT POLICY

Leask Marine Ltd recognises its role is to protect communities and the environment now and for the future. We are therefore committed to understanding and managing the environmental, economic, and social impacts of our operations through the delivery of sustainable solutions. The Policy seeks to embed the consideration of social, environmental, and economic impacts as factors in decisions made by employees and our partners.

Leask Marine Ltd strive to:

- 🌀 encourage and engage suppliers to develop a proactive approach to sustainability issues and deliver sustainable solutions
- 🌀 work in partnership and support our suppliers to continually improve our collective sustainability performance
- 🌀 identify and review the sustainability risks and impacts of the products and services we procure
- 🌀 embed sustainability within tender documents by ensuring these are a proportionate part of the assessment criteria for significant impact procurements
- 🌀 develop processes that enable local and SME businesses to remain part of our supply chain
- 🌀 develop internal training to increase knowledge and understanding
- 🌀 continue to be ethical in our business practices in dealing with our whole supply chain
- 🌀 consider and evaluate whole-life costs prior to major purchase items where appropriate
- 🌀 look to minimise the use of energy and natural resources and maximise the use of renewable energy sources
- 🌀 use and dispose of goods in an environmentally responsible way, including reducing, substituting, reusing, and recycling as sustainable options
- 🌀 work with our suppliers to achieve zero safety incidents on all the projects that we deliver

We recognise that improving our procurement performance is an ongoing process and that our suppliers are important partners in our aim to continue to become more sustainable.

We expect all our suppliers to work collaboratively and be supportive of our approach to continually improve performance, through the selection of sustainable products and solutions, innovative thinking, and the employment of best practice to meet our objectives and targets.

This policy and our performance against it will be monitored and reviewed annually by the Leask Marine Ltd Management team.
